## Face cancer with clarity, confidence, and peace of mind.

A cancer diagnosis brings a flood of information, difficult choices, and questions like: What does this mean for my future? How do I explain it to my loved ones? What are my treatment options—and which one is right for me? **Ardynn is here for you—helping you understand your options, access trusted resources, and make care decisions that align with who you are, what you value, and how you want to live.**

### Your Ardynn membership includes:

**A dedicated cancer-specialized private advocate:** compassionate, expert support backed by clinical insight, dedicated to you—not an institution

**Whole-person support:** help processing, planning, and moving forward with medical decisions, emotional challenges, financial concerns, and practical needs

**Exclusive treatment insights with Capire360:** helping you explore the treatment outcomes of people like you (same age, sex, race, diagnosis and health status) —based on real-world data, which is more relevant than clinical trial data

**Bridging communication with loved ones:** we help everyone involved understand your diagnosis, options, and quality-of-life impacts—so everyone understands the why behind your care plan

“

*My advocate's coaching about how to talk to my children about my cancer in a way that made sense to them was a huge relief to me and my wife.*

**-Joe W.**

*Seeing Capire360's proprietary outcomes data for people like me with the same cancer was a game changer.*

**- Steve L.**

”

Offered at **no-cost** through some health plans, employers, and healthcare providers.  
For those not covered, a self-pay option is available.
